

HOW DOES THE PROGRAM WORK?

1. A separate box must be ordered for each type of waste stream.
2. Order as many Recycle Kits as you anticipate needing for your facility.
3. When the box or pail is full, close the container securely, complete the FedEx return shipping label with your company's name and address and hand the box to your FedEx Ground driver the next time they make a routine pick up to your facility. If you are not set up for a routine pick up, you can contact FedEx to schedule the pick up by calling 1.800.GO.FEDEX.
