

## PCB CERTIFICATION

I, \_\_\_\_\_ (generator/title), certify to \_\_\_\_\_ (CE Facility) that within my company, I have knowledge concerning the accuracy of the following representations and that the following representations are correct to the best of my knowledge.

1. Customer has historic PCB contamination, and cannot attribute the contamination to any particular source. (Check applicable box below.)

- I am unable to locate any information which indicate that a spill of PCBs occurred subsequent to February 17, 1978, which could have contaminated the waste covered by this certification, and the actual PCB concentration of the waste is less than 50 ppm.
- Any PCBs detected in the waste covered by this certification resulted from a spill of PCBs that occurred prior to February 17, 1978, and the actual PCB concentration of the waste is less than 50 ppm.

2. Spill of PCB material occurred after February 17, 1978, and records or generator knowledge indicate that the contaminant source had concentrations less than 50 ppm. Pertinent sampling data to this certification must be attached. (Check applicable box below.)

- The waste covered by this certification has an actual concentration of PCBs less than 50 ppm per generator knowledge or analytical results.
- The source of the PCB contamination analyzed and found to have a PCB concentration less than 50 ppm.

3. Remediation Waste (40CFR 761.61)

- The waste covered by this certification is remediation waste, as defined by §761.3, from a cleanup managed under the self-implementing approach, §761.61 (a), with a PCB concentration less than 50 ppm.
- The waste covered by this certification is cleanup waste regulated under §761.61 (a)(5)(v). The waste may contain PCBs at any concentration and was generated during the cleanup of PCB remediation waste under the self-implementing approach.
  - Generator to attach copy of self-implementing notification submitted under §761.61 (a)(3)(i) and copy of approval of the notification.
  - "I certify that the attached self-implementing notification was submitted to the applicable regulatory authority for approval 30 days prior to the commencement of cleanup activity. The regulatory authority did not respond within 30 days of receiving the notification, therefore, it is assumed that the notification is approved."

Total volume of material to be shipped: \_\_\_\_\_ Total # of shipments: \_\_\_\_\_

Highest concentration of PCBs in material: \_\_\_\_\_

- The waste is remediation waste from a clean up conducted under the authority of CERCLA or RCRA.

4. Bulk Product Waste (40CFR 761.62)

- The waste covered by this certification is PCB bulk waste regulated under 761.62 (b)(1) which include components containing PCBs at greater than or equal to 50 ppm and leaches at less than 10 micrograms/liter PCBs.
- The waste covered by this certification is PCB bulk product waste regulated under 761.62 (b)(2) which include components containing PCBs at greater than or equal to 50 ppm and leaches at greater than or equal to 10 micrograms/liter PCBs.
