DESCRIPTION: _____

| HAZARD ASSESSMENT: | | |
|--|-----|----|
| Drum(s) been opened and inspected to verify 6 inch head space? | YES | No |

This document certifies that drums containing the waste material listed above have been opened and inspected to verify that each DOT shippable container has enough head space to allow for expansion while maintaining a six inch head space during transportation and normal storage conditions. We further certify that the material is stable for handling and transportation under normal conditions. By affixing my signature below, the above listed company indemnifies Clean Earth, Inc. of any and all liability associated with the transportation and handling of the material listed above.
